

Talbot Deb's

Dear Talbot,

I enclose the report on our paper
for the referee.

I think we can conclude that Damer
will definitely publish it, if we
include some comments on the parts
revised.

I enclose the paper with some
suggestions for revisions.

If you could put this in hand
we would be glad to submit 4 copies
of the revised manuscript. and let me
have the revised manuscript, I
will arrange for its submission, wait
a suitable cooling off period.

Let me know how soon you are getting
on this year, and what your plans are
for the future. A friend of yours, Fred
Damer and Robert ^{the latter} ~~the former~~ is well and
this year. We are beginning to work
on a joint paper on relativistic
EPR experiments, and may get something
done to enter a joint paper!

Very truly yours,
